

## Enhanced People Search

# Alternative credit and traditional data for skip tracing

Whether you're looking for an **accidental skip** or a **professional debtor**, Enhanced People Search is the solution for creditors and collectors who want to get more out of their skip tracing. Even the hardest skips can't hide from MicroBilt's Enhanced People Search.

Access data, aggregated only at MicroBilt from short term lenders, online and storefront retailers, and other businesses servicing consumers with thin/no traditional credit and thick collection files.

Our Enhanced People Search report also contains credit bureau header files as well as listed, unlisted and non-published telephone records from most of the major telephone carriers (RBOCs) across the US.

MicroBilt's **unique data sourcing strategy** blends together non-traditional and traditional data to deliver the most comprehensive skip trace solution available today. You can't find these results anywhere else.

Stay one step ahead of the game: Enhanced People Search tells you who they are, where they've been, and even where they're going.

### Report includes

- Name and AKA's
- Date of birth
- Social Security Number and validation
- Current address
- Address Summary with validation
- Phone Summary with validation
- Date of death & Death Master File
- Identification of high risk profile
- Summary header of reported and verified matches

ROUTE: R013 CENSUS

PHONE 2 VERIFIED: BLOCK 9640

The Social Security Administration (SSA) changed the way Social Security Numbers (SSNs) are issued beginning June 25, 2011. This change, referred to as "randomization", eliminates the geographical significance of the first three digits of SSNs, and no longer allocates the area numbers for assignment to individuals in specific states. Therefore, if the SSN Validation shows the SSN is invalid, Microbilt will report the SSN is either invalid, or issued after 06/25/11.
