SPOT Place of Employment

The most reliable and efficient way to locate someone's place of employment.

SPOT POE Database represents a significant advancement in place-of-employment locator tools: new data, new methods and a hit rate that far surpasses previous place of employment locators. It draws on a wide range of alternative data that can't be found anywhere else.

Using SPOT POE means you won't get stuck using old and out-of-date information. You will save time and money that might otherwise be wasted searching multiple databases that aren't specialized for place of employment.

SPOT POE utilizes a unique data sourcing strategy to support the debt collection and recovery efforts of banks, collection agencies, collection attorneys, debt buyers and other companies servicing the credit and collections industry.

KEY FEATURES AND FUNCTIONALITY

- Unmatched data from consumer lending applications, bank headers, contributory trade line sources and additional third party compiled data

- Real-time data feeds kept data fresh and current

- Current and historical place-of-employment returned on up to 6 employers

- Approximately 2-3 million unique consumers added each month

- A proprietary scoring model delivers a score to help determine collectability

Report includes
