

SPOT Verified Place of Employment

We find. We verify. You collect.

WHAT IT IS:

The SPOT Verified Place of Employment (POE) Report does the extra work to confirm an individual's current place of employment.

WHAT IT DOES:

With a hit rate 300-400% higher than standard competitive products, SPOT Verified Place of Employment outperforms standard searches. In addition to public and proprietary data sources, MicroBilt also includes public-facing social media – Facebook, LinkedIn, Twitter and Instagram among the data resources searched.

Each file is evaluated over a 30 day period to ensure POE hits are accurate and up to date.

WHAT IT IS USED FOR:

SPOT Verified Place of Employment Report gives collections professionals the confidence that they can call an employer knowing that the debtor currently works there. This saves time, money and effort during the collection process.

Includes

- Current and historical employment history
- Employer names
- Employer phone numbers
- Complete employer addresses
- Phone numbers
- Reporting Dates
